## Description

Perkins' mission is to nurture all students through providing a well-rounded education so they will become productive citizens in a ever-changing, technologically advanced, global society. In English language arts, we want our students to be able to debate and support point of view; evaluate, persuade, and justify; explain antonyms and synonyms; recognize multiple meanings in texts of familiar topic; understand idioms; and understand and create jokes.

In mathematics, they should be able to solve problems in a variety of ways; have a conceptual understanding of place value, addition, subtraction, multiplication, division, and fractions; explore and master measurement and geometry; and demonstrate advanced mathematical skill through the development of high-level algebraic thinking.

In addition to the academic focus on language arts and math, we ensure a balance of academic endeavors in science, social studies, physical education and the arts. Unique offerings include a strong chess program that includes competitive tournaments, ballroom dancing and a 3rd grade tile-creation program. Fifth-graders have the opportunity to take a trip to Washington D.C.

As we work incrementally toward a complete K-8 school, adding grade 7 in 2008-09, Perkins stands out in many ways. Students don uniforms. We have interventions in place as appropriate and necessary. We are proud to say that we have met AYP in all areas, continuously growing in English language arts over the past three years from 15.7 percent to 31.3 percent.
