

## Grade 2

# Geo Shapes

## Module 2 - Geometry

Your child is learning to identify and classify geometric shapes. Use this activity with your child to help him/her learn the names of shapes and to describe the attributes of the shapes using mathematical vocabulary.

### Materials:

- Shapes (cut out )
- Plastic bag (for storing shapes)

### Directions:

1. Cut out the geometric shapes.
2. Use as many shapes as you want to create a design.
3. When you are finished, place your shapes back into a plastic bag to use again.

### Questions to ask your child while creating a design:

1. What shapes did you use to create your design?
2. How many corners and sides does each shape you used have?
3. How are the shapes you used alike? Different?
4. Which triangles can you fit together to make a rectangle?

Encourage your child to use some of the following terms when describing shapes:

Triangle

Sides

Rectangle

Square

Congruent (same size and same shape)

Vertex/Vertices (corners in a shape)

Grade 2

# Geo Shapes

Module 2-Geometry

**Directions:** Cut out the shapes
