

Grade 2

Time Go Fish!

Module 11-Money and Time

Your child is learning how to tell time to the quarter hour. Help your child use this activity to practice telling time.

Materials:

- Digital Time cards
- Analog Time cards

Directions:

1. Cut out all the time cards.
2. Shuffle the cards and deal five cards to each player.
3. Place the rest of the cards face down.
4. If you have any pairs of cards that match (analog-digital), put them down in front of you.
5. The first player asks one of the other players for a card that shows the same time.

Example: Player 1 has analog 3:45 and asks for "three forty-five" looking for digital 3:45

6. If you get what you ask for, put that pair down.
7. If you do not get what you want, draw a card.
8. The next player repeats steps 5 - 7.
9. If a player runs out of cards, he/she draws a card from the pile.

10. The game is over when there are no more cards. The player with the most pairs is the winner.

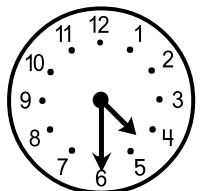

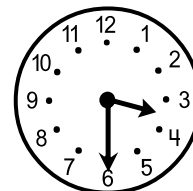

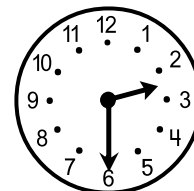

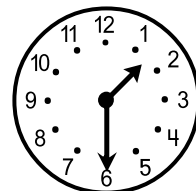

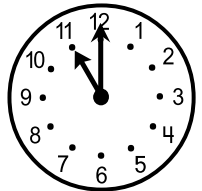

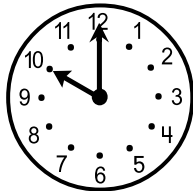

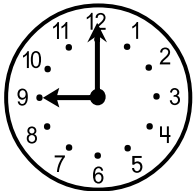

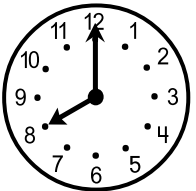

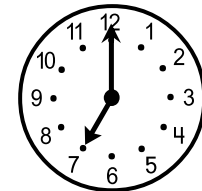

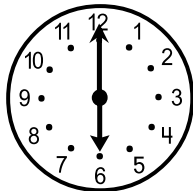

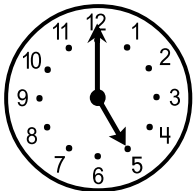

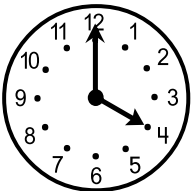

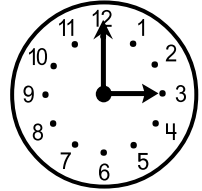

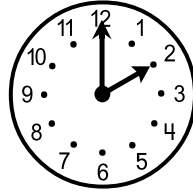

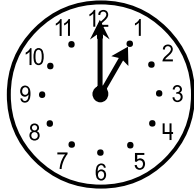

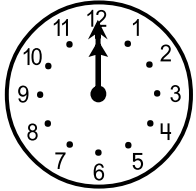

Questions to ask your child while playing:

- What time will it be in a half hour?
- What time will it be in 15 minutes?
