

Known Issue: Printing Assessment Reports

When printing page 2 of assessment reports using Batch Print, extra line returns may be inserted resulting in text that shows on the screen not printing. The issue has been reported and is being researched. In the meantime, to successfully print the page, open each Assessment Report Page 2 individually and print using the Adobe printer icon. All other pages may be printed using the Batch Print link.

The screenshot shows the ENCORE! web interface. At the top, the header includes the logo and navigation links. Below the header, a purple bar displays the student information: "Student: JOHN STUDENT100 ID: 210584240 Form: Assessment Report Page 2". A toolbar with various icons is visible, with a red arrow pointing to the Adobe printer icon. The main content area shows the assessment report details for "SAN DIEGO CITY SCHOOLS".
