

Johnson Magnet School

MISSION STATEMENT

The mission of the Johnson Magnet School for **Science, Technology, Engineering, and Mathematics (STEM)** is to foster an environment that demands academic excellence and social responsibility. One that promotes strong critical thinking and communication skills and prepares our students for a life of continued learning in a global society.

CORE VALUES

1. Collaborate with all **STEM** stakeholders.
2. Be accountable in providing a quality **STEM** program.
3. Celebrate and honor student and staff success.
4. Engage all students as learners and collaborators.
5. Access professional development to build new skills and knowledge.
6. Develop and sustain an innovative mindset.
7. Instill in each student his or her unique efficacy as a learner and member of society.

VISION STATEMENT

1. Students and staff daily utilize state of the art technology.
2. The **STEM** course of study is articulated K – 6.
3. Science is interconnected across the curriculum.
4. The physical surroundings enhance learning.
5. All students learn through inquiry based instruction.

SMART GOALS

Academic goals:

- 1) All students will complete the elementary grades prepared to succeed prepared to succeed in the middle school grades.
- 2) All students will develop a solid academic foundation for future study and careers in the field of science, engineering, technology and mathematics. Johnson **STEM** will cultivate a learning community that positively perceives and embraces scientific inquiry, mathematical thinking and implementation of technological innovation.
- 3) All students will value mathematics and become confident in their mathematical ability as problem solvers. Johnson **STEM** will cultivate a learning community in which students view math and science as a viable and concrete part of their academic, professional, and social lives.
- 4) All Johnson **STEM** students will take responsibility for their learning
