* A student is counted once for each AP courses taken; i.e., a student who took 2 AP classes and 2 AP tests and passed both tests would be represented by a 2 in the three columns even though it is the same student. This same student would be represented by a 1 total eligible students column.

** Some students take more than one test in one AP course. The # of AP tests taken column includes all tests taken; the % column counts a maximum of one test per course enrollment.
