

School of Digital Media and Design

“We are preparing our students for success, using their creative talents.”

Everyone has a story to tell, and at the School of Digital Media and Design, we want them to tell it to us through graphic design, advertising, animation, or film. Our goal is to create a personalized educational environment where students feel empowered and gain communication, technological, and critical thinking skills while studying a rigorous college preparatory curriculum.

Every student will be able to take advantage of real-world opportunities such as job shadows, internships, and work experiences. Combined with the curriculum, these experiences will help students prepare to be lifelong learners, find rewarding careers, and embark on the road to a successful future.

Along with opportunities to participate in activities unique to our school, students will also be able to share in the full spectrum of sports, extracurricular clubs, and ASB programs at the Kearny High Educational Complex. Upperclassmen will also have access to courses at Mesa College in our Fast Track Program and can simultaneously earn high school and college credits.

If you have a story to tell, we want to hear it. Come to the School of Digital Media and Design and explore your creative abilities while learning in a dynamic, individualized school environment.

Classes will emphasize collaborative multimedia projects, and students will be able to take advantage of unique digital media and design-oriented units of study:

- Advertising Art
- Intro to Digital Media Design
- Digital Photography
- Drawing and Painting
- Video Production
- Computerized Graphic Design
- Multimedia Production
