

Title: Email Spam Filtering

Effective Date: July 1, 2003

Last Updated: August 17, 2007

Policy: The district IT Staff has implemented Email spam filtering as a practice intended to alleviate users from receiving large volumes of junk mail or 'Spam' in their Email boxes.

Note: Although the IT department makes every attempt to eliminate Spam from users Email boxes, some Spam will be received by users. Our practice has been to impose as strict as rules as possible, without quarantining or rejecting legitimate Email.

The district receives up to 1,000,000 Email messages a day. We filter out approximately 96% of those messages as Spam. For details you can visit our [Spam Stat Site](#).
