

*Free public program for high school students, teachers, parents:*

## **MySpace or Your Space II: A Look at Privacy in Online Forums**

Date: Wednesday, February 27, 2008  
Time: 3 p.m. Light refreshments  
3:30 - 5:30 p.m. Program  
Location: Reuben H. Fleet Science Center, [www.rhfleet.org](http://www.rhfleet.org)  
Sponsor: The Center for Ethics in Science and Technology (Ethics Center)  
and the Reuben H. Fleet Science Center

Last July, we hosted a similar event for high school students on the subject of social networking sites. Interest was high and the program was very well-received by students and others. Because of its success, we are planning a repeat event. This event is particularly intended for San Diego high school students and their parents and/or teachers as well as the general public.

To help us explore this timely and relevant topic, we will be joined by **David Brin**, renowned science fiction author of *The Transparent Society* and recipient of multiple Hugo and Nebula awards. Dr. Brin will lead the event with an engaging presentation and facilitate a period of intriguing debate. This special program will explore a number of interesting questions including:

- Who reads what is posted on personal blogs?
- How might casual information posted today affect job prospects tomorrow?
- Would a code of conduct in online forums protect privacy or be an invasion?

For details and registration, please see <http://ethicscenter.net>.  
Registration will remain open until Monday, February 25 - please register as soon as possible.

Questions? Contact the Ethics Center at [info@ethicscenter.net](mailto:info@ethicscenter.net).

**Center for Ethics in Science and Technology**, [http://ethicscenter.net/](http://ethicscenter.net) The mission of the Center for Ethics in Science and Technology is to foster science in the public interest by promoting awareness, understanding and discussion of the ethical implications of new developments in science and technology.

**Reuben H. Fleet Science Center**, [www.rhfleet.org](http://www.rhfleet.org)  
The Reuben H. Fleet Science Center seeks to inspire life-long learning by furthering the public's understanding and enjoyment of science and technology.
